RESTYLE

SYSTEMS

RETHINK YOUR APPROACH TO IT

INTRODUCING RESTYLE SYSTEMS...

Reuse. Refresh. Restyle your IT estate

Restyle Systems offers premium Network, Server and Storage Infrastructure services that give you full control over the lifecycle of your IT estate. As a result, you're able to stretch your budget, enjoy greater flexibility on upgrade timescales, and meet the sustainability challenge by extending the life of your assets.

We're independent of the OEMs and proud of it. Meaning you benefit from solutions that are designed to suit you - not the manufacturer.

Ultimately, what we do is great for you.

And better for our environment.

WORKING AS AN EXTENSION OF YOUR TEAM.

We deliver Professional IT Services throughout the United Kingdom and worldwide. From network discovery audits and IT deployment to relocation and Smart Hands support, simply select the services that match your requirements.

We provide support for business-critical services and applications while acting as a single point of contact to manage project delivery. From planning to execution, you can expect minimum disruption, allowing you to focus on core services.

WHY UTILISE OUR PROFESSIONAL SERVICES?

Our comprehensive offering means you don't need to waste time and money searching for individual suppliers. Take a joined-up approach and utilise our extensive in-house and partner expertise to get the support you need in one place.

From small projects to multi-site assignments involving hundreds of assets worldwide, you're guaranteed to receive expert care.

And unlike the traditional channel, we provide the ability to pick and choose services that are available on flexible contracts.

OUR PROFESSIONAL SERVICES

NETWORK DISCOVERY AUDIT

Receive a comprehensive and accurate inventory of your physical assets, alongside post-event recommendations.

IT INFRASTRUCTURE DEPLOYMENT

Seamless delivery and installation, including budgeting, procurement, staging, kitting and help desk support.

IT INFRASTRUCTURE RELOCATION

Local and international IT relocation that won't impact upon your business operations. Fully managed service with essential Day 1 support.

IT SMART HANDS SUPPORT

On-demand or SLA/subscription-based support. Providing on-site expertise in cabling, asset management, installation, decommissioning and more.

WIRELESS SERVICES

Full lifecycle of services from survey and design to installation. Enjoy excellent connectivity at any given facility.

BENEFITS TO YOU

ONE POINT OF CONTROL

We assume complete responsibility for the services you receive. While we might use carefully selected partners, we're accountable for delivering to the standards you expect.

WORLDWIDE COVERAGE

Our in-house experts and partners provide global support. This means you can rely on us to provide on-site assistance in most major international locations.

AUGMENTED SUPPORT

Our experts slot in seamlessly to your team, scaling up and down as required. Get on-demand support from specialist engineers that are ready to go when you are.

FLEXIBLE CONTRACTS

You won't be tied down to services you no longer require. Our flexible contracts are designed to ensure you only pay for services you need, for as long as you need them.

EXTENSIVE IT RELOCATION SERVICE PROVIDES PEACE OF MIND

THE CHALLENGE

A global gaming and online gambling organisation needed to move datacentre and corporate IT hardware to new locations across the U.S and Canada. Traditional IT relocation providers and Smart Hands support can be unreliable. And that can only add to the stresses involved in migrating critical infrastructure.

THE SOLUTION

We gave full project support and liaised with the customer teams on the ground to ensure they experienced a smooth transition. From staging migrations and decommissioning hardware to providing secure transportation for data sensitive items, all bases were covered. For added peace of mind the end-to-end process also included cabling, staging and testing at new locations.

INDEPENDENCE THAT SETS YOU FREE

The IT procurement market is changing. Because IT leaders have discovered there's a better way to meet today's challenges. A reputable, independent way that won't leave you reliant on the traditional reseller channel or tied down and feeling trapped by the OEMs.

Our combined services provide a one-stop solution to the key issues we consistently encounter. Think of us as the second-string that every organisation needs on its side. Always working in your interests and setting the benchmark for quality and reliability within the independent channel.
